

Colt

A fixed recessed downlight that features a customisable bezel with a diameter of up to 300mm – a perfect solution to retrofit into existing ceiling holes without secondary plates or rings. 3D printed from biopolymer, it includes a high-efficiency COB LED module, reflector, and remote electronic driver. Designed to be circular, Colt uses a modular design, so it is fully serviceable and upgradable. As part of the buy-back scheme, it can be returned to us at end of life when 71% of it can be reused or recycled.

Colours	Light Source	Variations
