

NORT GS with Casambi

A unique and compact design, this track-mounted spotlight offers a 90-degree tilt and 350-degree rotation. 3D printed from biopolymer, it includes an enhanced efficiency COB LED module, reflector, and track-mounted driver. Designed to be circular, NORT GS uses a modular design, so it is fully serviceable and upgradable. As part of the buy-back scheme, it can be returned to us at end of life when 72% of it can be reused or recycled.
