

Origin23 is our first 3D printed pendant lighting solution, a sustainable alternative to imported lighting pendants. The range focuses on natural, repurposed, low CO2 and non-hazardous materials with recycled industrial by-products like coffee grounds, mussel shells and beer dregs. Pendants are manufactured to order, and 3D printed in one piece. Versatile designs offer flexibility to match your brand's unique style, colour and texture preferences. As part of the buy-back scheme, it can be returned to us at end of life when 100% of it can be reused or recycled.

Colours - Naturals 2024

Colours - Autumn 2024

Materials

PLA biopolymer and industrial waste
PLA and earth minerals

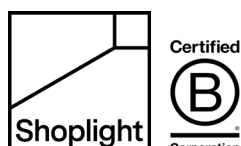

Some Origin23 products are made from natural materials, meaning imperfections in the printing process can occur.
