

Raider - Lens LQ

A recessed adjustable spotlight that provides superior light control. Its Precision Aiming System offers 350-degree rotation with a 60-degree tilt; 10 degrees more flexibility than its aluminium counterpart. Its customisable diameter covers any existing hole size up to 300mm in diameter without secondary plates or rings. 3D printed from biopolymer, it includes a COB LED module, 4 different beam angle reflectors, and a remote electronic driver. Designed to be circular, Raider uses a modular design, so it is fully serviceable and upgradable. As part of the buy-back scheme, it can be returned to us at end of life when 79% of it can be reused or recycled.

Colours

White, Black and Grey
Special colours and textures available
